

## Facilities Maintenance Services

ESI's Facilities Maintenance Division specializes in complete building and grounds inspections, maintenance, certifications, and installation of new or replacement equipment. From monthly fire extinguisher and light inspections to the replacement of large building chillers, our technicians are skilled in all tasks of building maintenance. We ensure that each facility is inspected monthly and that our technicians are available 24/7 for any emergency situations.

We are proactive in our facilities approach to extend the life of equipment and building systems. ESI specializes in building maintenance needs for the U.S. military providing multi-site, nationwide services.
